PROFESSIONAL EXPERIENC

Dev Entity | Android Developer

March 2025 - Present

- Contributed to a live Android application with 5M+ downloads and 4.4★ rating on Google Play Store
- Developed and maintained a multi-module e-commerce Android application serving 4 business domains: Retail/Grocery, Food Delivery, Beauty, and Pharmacy
- Implemented modular architecture with 25+ feature modules using Clean Architecture and MVVM patterns
- Built reusable UI components using Jetpack Compose across multiple feature modules
- Integrated GraphQL APIs using Apollo Client for efficient data fetching and caching
- Worked with feature flags system for A/B testing and gradual feature rollouts
- Implemented cart management and checkout flow optimization
- Utilized Dagger Hilt for dependency injection across multi-module architecture
- Implemented analytics tracking and crash reporting for production monitoring

Self-Employed | Android Developer

Sept 2023 – Feb 2025

- Trained under a senior Android developer and built production-quality applications using Kotlin and Jetpack Compose
- Developed 8+ Android applications ranging from basic to fully functional, including an AI-integrated chat app, real-time messaging app, news app, expense tracker, medicine calculator, and weather app demonstrating consistent hands-on practice across diverse domains
- Gained hands-on experience in Clean Architecture, MVVM, MVI, Firebase, Dagger Hilt, and REST API integration
- Focused on writing clean, scalable, and maintainable code following industry best practices

PRODUCTION & PERSONAL APPLICATIONS

CricScore

Android Sports Application (Live on Google Play)

- Developed and published a production-ready Android application on the Google Play Store.
- Built using modern Android architecture with Jetpack Compose, MVVM, and REST APIs.
- Focused on performance, maintainability, and a smooth user experience across production releases.

SUMMARY

Experienced Android Developer with 3+ years of overall experience in Kotlin and Jetpack Compose, including 2 years of professional contribution to a production-level application with 5M+ downloads on Google Play Store. Specialized in multi-module architecture, Clean Architecture, and modern Android development practices. Proven track record of working with complex business domains including retail, food delivery, beauty, and pharmacy verticals. Strong expertise in MVVM,Clean Architecture, GraphQL integration, and performance optimization.

SKILLS

Architecture: Clean Architecture, MVVM, Multi-module Architecture

UI Frameworks: Jetpack Compose, XML Layouts, Material Design 3

Networking: Retrofit, GraphQL (Apollo Client), RESTful APIs

Database: Room Database, Firebase Realtime Database, Firestore, Supabase

Dependency Injection: Dagger Hilt

Analytics: RudderStack

Authentication: Firebase Authentication, Google Sign-In

Feature Management: Feature Flags

Version Control: Git, GitHub

Build Tools: Gradle

Other: Coroutines, Flow, Navigation Component, Deep Linking
