Summary

Hi there, I'm Fardeel Azhar! Experienced Android Developer with 2+ years of expertise in Kotlin and Jetpack Compose, including professional contribution to a production-level application with 5M + downloads on Google Play Store. Specialized in multi-module architecture, Clean Architecture, and modern Android development practices. Proven track record of working with complex business domains including retail, food delivery, beauty, and pharmacy verticals. Strong expertise in MVVM, GraphQL integration, and performance optimization. # Tech Stack: Kotlin | Jetpack Compose | Android Development Hobbies: Cricket lover Currently working on: Production-level Android e-commerce application Currently learning: Agentic AI Ask me about: Android development, Jetpack Compose, Kotlin How to reach me: fardeelazhar82@gmail.com

Experience

Dev Entity
Junior Android Developer
April 2025 - Present (1 year 7 months)
Okāra, Punjab, Pakistan

Freelance (Self employed)
Android Developer | Softwere Developer
December 2022 - April 2025 (2 years 5 months)
Okāra, Punjab, Pakistan

As a Freelance Android Developer , I specialize in creating Android apps from concept to deployment, utilizing the latest technologies to ensure high performance and seamless user experience. My focus is on building scalable, user-friendly apps with modern design patterns and efficient backend integration.

Built Android Apps

Developed fully functional mobile applications with Kotlin, Jetpack Compose, and Firebase to ensure clean, maintainable, and modular code.

UI/UX Focused

Focused on delivering modern, intuitive, and responsive user interfaces that enhance the overall user experience.

Backend Integration

Integrated REST APIs, Firebase, and Room Database to create fully functional, cloud-backed applications.

Collaborative Experience

Contributed to open-source projects and collaborated with senior developers to enhance my skills in advanced Android development techniques.

Key Projects

Chat App
Built a fully functional real-time chat app with Firebase authentication and messaging.

Expense Tracker
Designed an app to track daily expenses with features like chart-based analytics and database storage using Room.

Instagram Clone
Developed a UI-centric Instagram clone focusing on modern Android development techniques like Jetpack Compose and Firebase.

Other Projects
Contributed to building and refining apps, with an emphasis on UI/UX and performance optimization.

Education

Virtual University of Pakistan (VU)

Bachelor's degree, Computer Software Engineering · (October 2025 - January 2029)
